

Activity Exemplar: Outline the user flow for your portfolio project

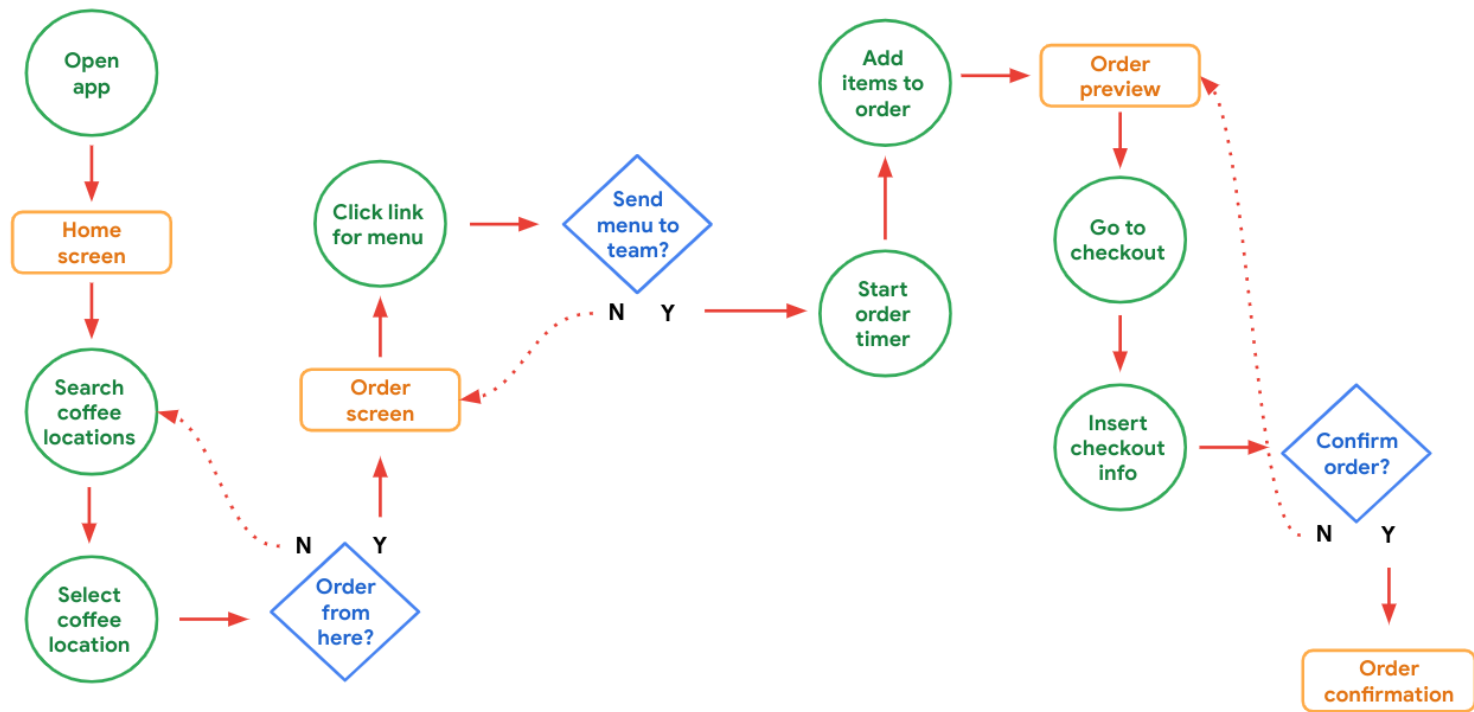

Here is a completed user flow for the CoffeeHouse app example we have been following in this course, along with an explanation of how this exemplar fulfills the expectations for the activity.

Note that while this exemplar uses CoffeeHouse, your work should be for your portfolio project.

Exemplar

User task: Use the CoffeeHouse app to place a group coffee order quickly and easily.

Assessment of exemplar

Self assess the user flow you created in the activity, using each of the criteria below.

The exemplar user flow provides:

- A clear and easy flow for users to get from the entry point of opening the app, to task completion of an order confirmation.
- Clearly labeled steps that are each represented by the appropriate shape.
- Lines with arrows connecting all the steps of the user flow.

Compare this exemplar to the user flow diagram you created in the activity. What did you do well? Where can you improve? Take this feedback with you as you continue to progress through the course.
