PROMPT

Upload a **PDF** file of your refined wireframes. To export your wireframes as a **PDF** in Adobe XD, select the artboards you want to export, open the File menu in the top-left corner of the screen, navigate to Export in the drop-down menu, then choose Selected or All Artboards if you're exporting all of your artboards. Next, find the Format option in the pop-up box, change it to **PDF** and click Export.

Before submitting, check that you can answer yes to the following questions related to your submission:

1. Did you use at least 1 design standard/principle, such as one of the 3 common Gestalt Principles (similarity, proximity, common region)?
2. Did you use at least 2 sizes for your homepage (e.g., mobile and desktop)?
3. Did you include at least 2 sizes for an additional page other than your homepage?
4. Did you make sure that the formats of UI components between homepage screens were removed, changed locations, or changed formats to make navigating different screens easier?
5. Did you use wireframe industry standards, like placeholder icons, horizontal lines for text or rectangles with X's over them for images?
6. Did you emphasize your site's focal points, landmarks, and headings for accessibility?
7. Did you use industry-standard dimensions for each screen according to screen type?
8. Did you use a clear and logical layout for each screen?
