

Introduction to Course 5

Begin to create a mockup

Use typography in mockups

Use color in mockups

-  **Video:** Color in UX design
8 min
-  **Practice Quiz:** Test your knowledge on color
4 questions
-  **Reading:** Work with color in mockups
20 min
-  **Reading:** Accessibility considerations for color
20 min
-  **Practice Quiz:** Activity: Add color to your portfolio project mockups
1 question
-  **Reading:** Activity Exemplar: Add color to your portfolio project mockups
10 min

Use iconography in mockups

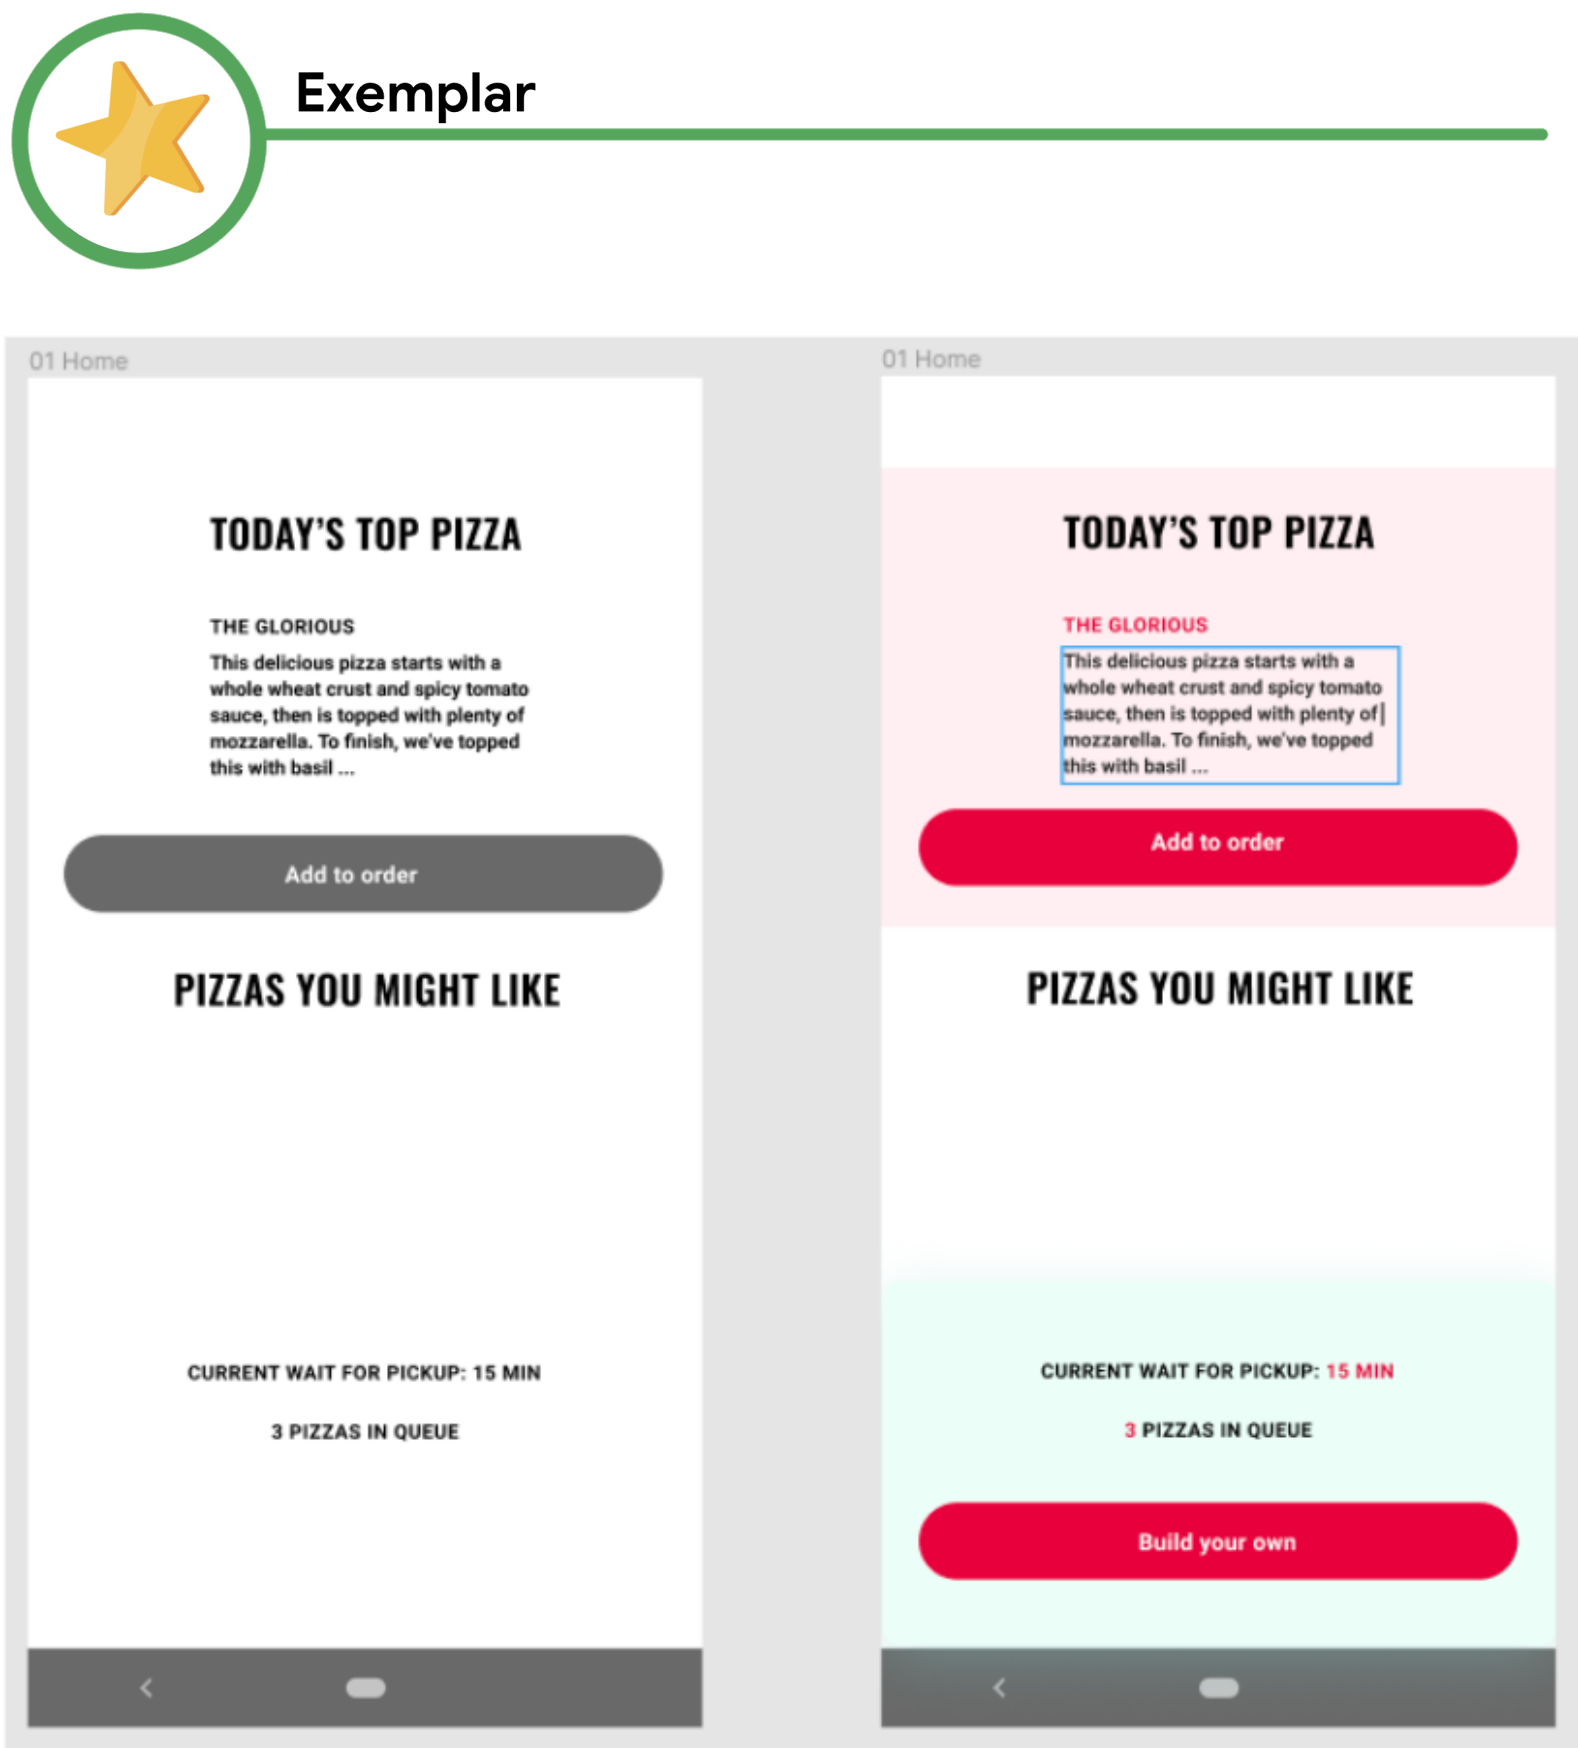

Understand page layouts - grids and containment

Understand page layouts - negative space

Week 1 review

Activity Exemplar: Add color to your portfolio project mockups

Here is a completed exemplar along with an explanation of how the exemplar fulfills the expectations for the previous activity

Assessment of exemplar

Assess the colors you added to your mockups in the activity, using the criteria below.

This example uses a bright red for the buttons so they stand out for easy navigation. The same eye-catching red is used again to emphasize important text and to group elements together. Complementary light pink and green fills add variety and make the design more pleasant. These pastel colors also provide a good background for the dark gray text on top to pass WCAG accessibility standards. The rest of the background is kept solid white to provide a minimal background and allow other elements to stand out.

Compare the exemplar above to your completed deliverable. What did you do well? Where can you improve?

Take this feedback with you as you continue to progress through the course.

Mark as completed
