Understand page layouts - negative space

Week 1 review

# Activity Exemplar: Create containment in your portfolio project mockups

Here is a completed exemplar using the Zia's Pizza example you have been following, along with an explanation of how the exemplar fulfills the expectations for the previous activity.

Exemplar

01 Home

ZIA'S PIZZA

TODAY'S TOP PIZZA

THE GLORIOUS

This delicious pizza starts with a whole wheat crust and spicy tomato sauce, then is topped with plenty mozzarella. To finish, we've topped this with basil ...

Add to order

PIZZAS YOU MIGHT LIKE

The Incredible

1000 Calories (M)

\$15.55 (M)

Assessment of exemplar

In the version to the left, it's difficult to tell where one section ends and the next one begins. In the version to the right, a divider is used between the top navigation bar and the content below it. Another divider is placed between the current wait time and the number of pizzas in the queue to separate the content sections, and a fill added to the background. The fill is meant to show a more permanent separation than the inset divider which is separating different content of the same section.

Adding a fill to the “Today’s Top Pizza” section helps distinguish it from the other content sections. Adding a shadow to the “Pizzas You Might Like” section allows it to act like a card, separating it from the rest of the content and making it easier to repeat throughout the design.

Now compare the exemplar above to your completed deliverable. Assess what you’ve done using each of the criteria used here to evaluate the exemplar.

Keep these criteria in mind as you evaluate your work:

- Dividers were added to the mockups in appropriate places
- Borders were added to the mockups in appropriate places

What did you do well? Where can you improve? Take this feedback with you as you continue to progress through the course.

Mark as completed
