PROMPT

Include a sharable/accessible link to your interactive prototype in Figma. Indicate any instructions necessary for your reviewers.

Before submitting, make sure your prototype:

- 1. Connects at least four distinct wireframes allowing completion of a main user flow
- 2. Includes links that allow users to proceed forward and backward within the sequence
- 3. Embeds cues for user navigation that are clearly indicated within the prototype

Two additional best practices are to:

- 1. Display messaging or navigational cues that indicate successful completion of the simulated user flow
- 2. Include a means for users to return to the starting point after successfully completing the flow sequence
