Start the next course

Congratulations on completing Course 5 of the Google UX Design Certificate!

To make continuing with the certificate program easy, here is a link to Course 6:

[Responsive Web Design in Adobe XD](#) . You may need to enroll in the next course, if you have not already.

In Course 6, you will learn how to design a responsive website using Adobe XD, a popular design tool. You will select a new project prompt and complete the design process from beginning to end: empathizing with users, defining their pain points, coming up with ideas for design solutions, creating wireframes and prototypes, and testing designs to get feedback. By the end of the course, you will have a new design project to include in your professional UX portfolio.

So without further ado, get started with the next course of the certificate program! You only have two more courses to go.
