

1. You are creating an alternative design for an app using the Material Baseline Design Kit in Figma. You find a style for the navigation bar you'd like to add to the app. You copy the selected style from the _____ page and paste it to the new page.

0 / 1 point

- ☒ Material Theme
- ☐ Cover
- ☐ Sticker Sheet
- ☐ Getting Started

☒ Incorrect
The Material Theme page highlights some of Figma's components, but you would need to access to the Sticker Sheet page for a list of components you can use to build or modify your design.

2. A designer begins a new project by reviewing the elevation section in the Material Baseline Design Kit in Figma. Which of the following design features should they apply a higher elevation to? Select all that apply.

0.75 / 1 point

☒ Navigation

☒ Correct
Features like navigation would benefit from a higher elevation because they help the user get to their desired destination. Design features like alerts and buttons would also benefit from a higher elevation.

☒ Alerts

☒ Correct
Features like alerts would benefit from a higher elevation because the user can identify important information easily. Design features like navigation and buttons would also benefit from a higher elevation.

☒ Page background

☒ This should not be selected
An elevation for a page background is typically at the lowest level so that it serves as the foundation for the page. Design features like alerts, navigation, and buttons would benefit from a higher elevation.

☒ Buttons

☒ Correct
Features like buttons would benefit from a higher elevation because they help the user complete tasks easily. Design features like alerts and buttons would also benefit from a higher elevation.

3. Including a design system in your case study showcases the creative and strategic design choices you've made while enriching your portfolio for future job opportunities.

1 / 1 point

- ☒ True
☐ False

- ☒ Correct
Each design choice you make affects how users will see and interact with your product. Highlighting these in a design system and including that design system in a case study showcases your talent and skills to future employers.
