

1.

You've learned about the importance of accessibility in your designs. You've also learned how those same considerations should be applied when adding motion to your designs. Now, reflect on the tips you learned for ensuring accessibility in motion and share the one tip that stood out to you the most. Consider the following as you craft your response:

How do you plan to incorporate what you learned in your design projects?

Please include a written response of one to two paragraphs (100-200 words).
