

Activity Exemplar: Create a sitemap

Exemplar

Here is a completed exemplar, along with an explanation of how the exemplar fulfills the previous activity’s expectations.

Assessment of exemplar

This sitemap for the Food Saver website shows the basic, top-down layout of the site. This sitemap uses a hierarchical structure and shows the parent/child relationship of categories and subcategories.

The sitemap starts with an element representing the "Home" screen at the top and includes an element representing every other screen in the flow. You'll note that there's no content on this sitemap, just the pages themselves. This provides an extensive view of individual pages on the site and how they all fit together.

Now compare the exemplar above to your completed deliverable. Self-assess what you’ve done using each of the criteria used here to evaluate the exemplar. What did you do well? Where can you improve? Take this feedback with you as you continue to progress through the course.
