#### Introduction to Course 5

Begin to create a mockup

Use typography in mockups

Use color in mockups

#### Use iconography in mockups

- Video: Iconography in UX design 5 min
- Reading: Work with icons in mockups
  20 min
- Practice Quiz: Activity: Add icons to your portfolio project mockups
  1 question
- Reading: Activity Exemplar: Add icons to your portfolio project mockups

  10 min
- Discussion Prompt: Share an example of icons from your favorite app

  10 min
- () Ungraded Plugin: Build a mockup from foundational elements
  30 min
- Reading: Learn about more visual design elements
  20 min
- Video: Add images to your mockups
- Reading: Find stock images for mockups
  20 min
- Reading: Additional design considerations

Understand page layouts - grids and containment

Understand page layouts - negative space

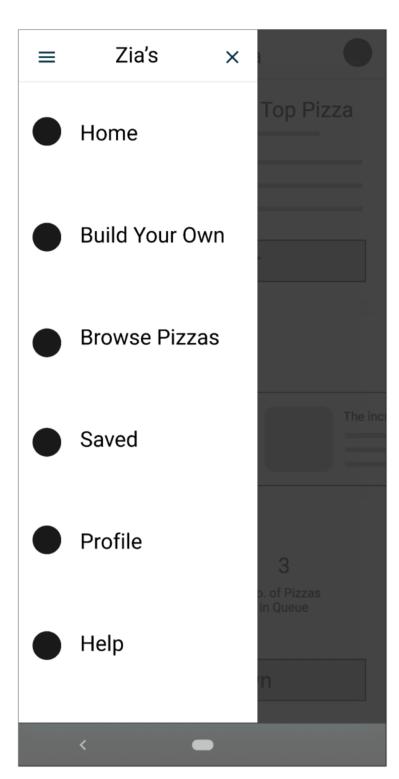

Week 1 review

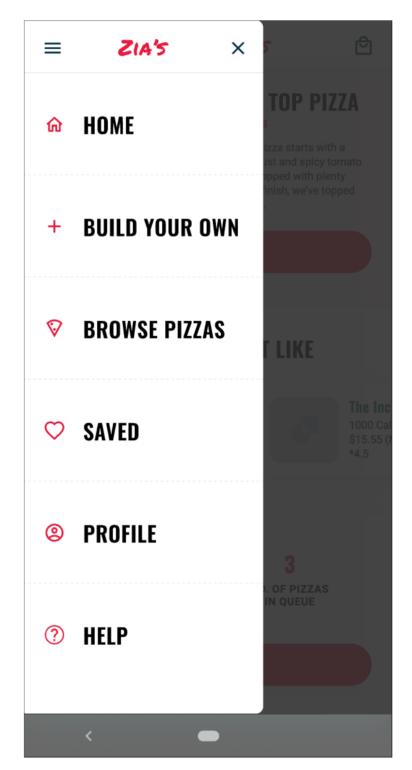

# Activity Exemplar: Add icons to your portfolio project mockups

Here is a completed exemplar along with an explanation of how the exemplar fulfills the expectations for the previous activity.

## **Exemplar**

## **Assessment of exemplar**

Assess the icons you added to your mockups in the activity, using the criteria below.

In the example above, the navigation panel has been updated with icons. There is a mix of industry standard, commonly recognized icons (like the home icon) as well as icons that are more specific to this app (like the pizza icon). For something that doesn't have an industry standard or a specific icon, you should make sure to validate with testing. In this exemplar, the + (plus sign) for **Build Your Own** is a choice that works for now, but it could be worth investigating whether the icon is user-friendly during usability testing. Regardless, in context all of these icons clearly identify what they do and make it easier for a user to navigate in the product.

These icons are all freely available from the **Material Design** icon set. For a prototype, it's a good idea to check what's available before spending time to create something brand new.

Now compare the exemplar above to your completed deliverable. What did you do well? Where can you improve? Take this feedback with you as you continue to progress through the course.

Take this feedback with you as you continue to progress through the course.

### Mark as completed
