Activity Exemplar: Use low-fidelity designs to start your portfolio project mockups

Here is a completed exemplar of the blank frames created for the mockups of the Zia's Pizza app. The Zia's Pizza app is a fictional pizza ordering app which will be used as an example throughout this course to demonstrate the concept you are practicing in each activity. Below, you'll find blank mockup frames for the Zia's Pizza app, organized by the number and order of screens that will appear in the app.

Exemplar

Assessment of exemplar

In the exemplar, there are two pages in the Figma file: one titled Wireframes and one titled Mockups. This makes the content organized and makes it clear what type of content can be found in each page. In the Mockups page, a blank frame has been created for each screen that will appear in the mockups. The number of frames created was based on the number of low-fidelity wireframe frames.

Compare this exemplar to the start of your mockups created in the activity. What did you do well? Where can you improve? Take this feedback with you as you continue to progress through the course.
