Learn more about Gestalt Principles in wireframes

At this point in the certificate program, you've applied Gestalt Principles to your designs many times! As a reminder, **Gestalt Principles** describe how humans group similar elements, recognize patterns, and simplify complex images when we perceive objects. You can use these principles to organize content on apps and websites, so it is visually pleasing and easier to understand.

To learn more about how to apply Gestalt Principles to your responsive website designs, review
the video Use Gestalt Principles when creating wireframes ↗ and
the reading Learn more about using Gestalt Principles in wireframes ↗
from a previous course of the program.
