1.

Please share the portfolio project prompt that you chose to work on during this course of the certificate program.

If you have been taking the courses of this certificate program in order, you will continue to develop the mobile app designs that you've worked on for the previous three courses. Your prompt will remain the same.

If this is your first course of the certificate program, you can submit a project prompt from the custom list on Sharpen↗, or you can state that you will utilize the starter materials.
