1.

You learned best practices for writing a UX designer's resume. You also learned how to update information on a resume based on sample job descriptions. Now, reflect and share a response to the following:

What types of information about yourself and your projects would you like to add to a resume?

Create a list of your qualifications, skills, and experiences.

How you would adjust your projects or skills based on different types of roles (generalist, specialist, etc.)?
