# Find stock images for mockups

As you work on your mockups, you might want to include an image to illustrate a concept or to act as a placeholder. There are many sites where you can download images for free, including:

- <u>Unsplash</u> ↗: Search and download free, high-resolution images.
- <u>Blush</u> ↗: Create and customize free illustrations by artists from all over the world. You can install the plugin or create your own doodle.

Check out these two great resources, and bookmark them to use while you design!
