1. Fill in the blank: Wireframes establish the basic _____ of a page and serve as an outline of a digital experience.

   1 / 1 point

   ○ functional specifications
   ○ images
   ◉ structure
   ○ text

   ✓ Correct
   Wireframes establish the basic structure of a page and serve as an outline of a digital experience.

2. Which of the design fidelity types would you use if you need to get ideas out quickly while leaving room open for exploration?

   1 / 1 point

   ○ Medium-fidelity design
   ○ High-fidelity design
   ◉ Low-fidelity design

   ✓ Correct
   Low-fidelity designs are less complex and allow designers to sketch ideas quickly.

3. Identify characteristics of a low-fidelity (lo-fi) design. Select all that apply.

   1 / 1 point

   ☑ Low-fi designs use simple shapes and lines

   ✓ Correct
   Compared to its high-fidelity counterpart, low-fidelity designs characteristically use simple shapes and lines. They're also less refined and polished.

   ☐ Lo-fi designs include graphics and images
   ☑ Low-fi designs are often used to get ideas out quickly.

   ✓ Correct
   UX designers create low-fidelity designs to get ideas out quickly and leave room for exploration. Compared to its high-fidelity counterpart, low-fidelity designs characteristically use simple shapes and lines. They're also less refined and polished.

   ☐ Lo-fi designs are highly refined and polished
