1. What is a panel interview? 0 / 1 point

○ An assessment of multiple candidates
○ A strategic method of answering questions
○ A group's assessment of a designer's skills, experience, and work ethic
◉ A real-time, practical demonstration of a designer's skills

⊗ Incorrect
A panel interview generally consists of meeting a group of people who want to assess a designer's skills, experience, and work ethic. A whiteboard interview is a real-time, practical demonstration of a designer's skills.

2. During a panel interview, what might be expected of a designer? Select all that apply. 0.5 / 1 point

☑ Showcase any coding knowledge

⊗ This should not be selected
During a panel interview, a designer will be expected to answer questions regarding their work ethic, approach to problem-solving, and to showcase their portfolio. The panel will assess a designer's skills and experience throughout the discussion.
Unless the role specifies coding knowledge as a requirement, it won't be expected of a designer to have this skill.

☑ Answer questions about their experience and skills

⊘ Correct
During a panel interview, a designer will be expected to answer questions regarding their work ethic, approach to problem-solving, and to showcase their portfolio. The panel will assess a designer's skills and experience throughout the discussion.

☑ Showcase their portfolio

⊘ Correct
If a designer is asked to submit a design exercise before a panel interview, they may be asked to present the exercise to the group. They will also be asked to answer questions regarding their work ethic and approach to problem-solving.

☑ Offer a practical demonstration of their skills

⊗ This should not be selected
During a panel interview, a designer will be expected to answer questions regarding their work ethic, approach to problem-solving, and to showcase their portfolio. The panel will assess a designer's skills and experience throughout the discussion.
Unless it is specified to take place during a panel interview, a practical, real-time demonstration of a designer's skills typically takes place during a whiteboard interview.

3. A whiteboard interview gives interviewers a chance to assess a designer's knowledge, thought processes, design capabilities, and communication skills.

1 / 1 point

◉ True

◯ False

✓ Correct
A whiteboard interview is a practical, real-time demonstration of a designer's skills. It provides interviewers an opportunity to assess a designer's knowledge, thought processing, design capabilities, and communication skills in action.
